

**Contemporary sunbed**

Updated version of the traditional sunbed, usually in metal with a fabric or mesh sling. Some designs have spring-operated back rests so you can alter the position by a fraction.

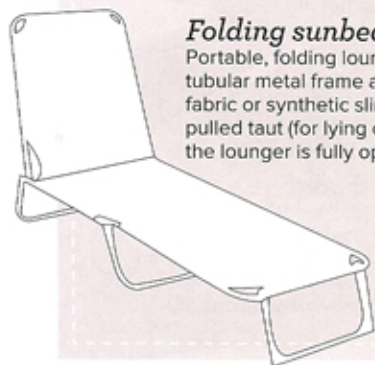

**Steamer**

Hardwood folding chair traditionally used for lounging on the decks of passenger ships. Usually with arms, a full-length leg rest and adjustable reclining back.

**Day bed**

Modern outdoor bed with a woven 'all weather' base and separate canvas-covered mattress. Designs range from simple chaise or sofa shapes to circular beds with optional sun shades.

**Folding sunbed**

Portable, folding lounger with tubular metal frame and a fabric or synthetic sling that is pulled taut (for lying on) when the lounger is fully open.

**GOOD TO KNOW**

Measure the area where you'll use the sun lounger to check there's space to recline it fully. Make sure the ground is flat and level so there's no danger of it tipping over
